

Pressure Seal Globe Valve Manufacturer in USA

Valvesonly is the finest [Pressure Seal Globe Valve Manufacturer in USA](#). The Pressure Seal Globe Valve serves the purpose of exerting the necessary pressure within the valve body and its bonnet. As the pressure escalates within the system connected to the pressure seal globe valve, the strain on the valve's seal also increases. This variety of valve finds utility across a diverse spectrum of applications. Its primary benefit lies in its versatility, as it can be employed for regulating flow as well as for switching flow on and off. Furthermore, it is suitable for use in both high-pressure and high-temperature conditions.

Valvesonly one of the topmost suppliers of [pressure seal globe valve manufacturer in USA](#) gives various designs and sizes in it.

PARTS

- Disc
- Stem
- Disc nut
- Bonnet
- Yoke
- Bolt
- Nut
- Packing
- Gland

Advantages of Pressure Seal Globe valve:

- They can even be used as a check valve
- Suitable for both on/off and throttling purposes
- Can be used in both high pressure and high temperature environments
- Does Efficient working.
- Uncomplicated design

Industries that use Pressure Seal Globe Valve:

- Petrochemical Industry
- Oil and Gas Industry
- Power Industry
- Chemical Industry

Description:

- Body materials: Carbon steel, A105, F304, F316, F304L, F316L, F51, F53, F11, F22.

- Class: 150 – 2500, PN25 to PN450
- Size: 1/2"-48".
- Ends: Socket weld, butt weld, flanged, threaded.
- Operation: handwheel operated, gear operated, electric actuated, pneumatic actuated.
