What is an Abortion pill pack?

A combination of medicines used to end an early pregnancy is commonly referred to as an abortion pill pack. This **abortion pill pack** contains a combination of **mifepristone and misoprostol**.

www.privacypillrx.com

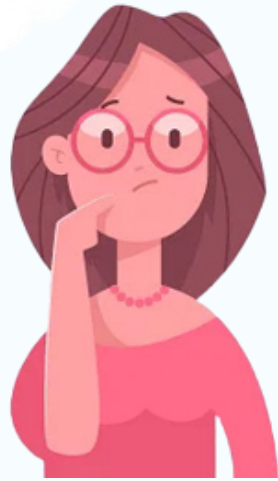

HOW DOES THE ABORTION PILL PACK WORK?

Mifepristone: The medicine works by preventing progesterone from being produced, which is necessary for a pregnancy to progress. Mifepristone causes the uterine lining to rupture by preventing progesterone, which causes the embryo or fetus to separate from the uterine wall.

Misoprostol: This medicine is often used between 24 and 48 hours following mifepristone. The uterus contracts as a result of misoprostol, pushing out everything inside, including the embryo or fetus.

WHAT IS THE DOSAGE OF ABP?

- Initiate the abortion process by taking the initial **Mifepristone** pill orally with water. Following a time span of 24 to 48 hours, proceed with the Misoprostol pills. Begin by placing 2 Misoprostol pills beneath the tongue, allowing them to dissolve within the mouth or between the cheeks and gums. After a 3-hour interval, administer the remaining **Misoprostol** pills in the same manner, positioning them under the tongue or within the cheek area.
- To counteract potential vomiting, it is advisable to consume the **Zofran or Ondansetron** pill just before taking the misoprostol pills.
- To alleviate cramping, consider using **Flexon-MR** at the onset of abdominal cramps.
- In the event of increased bleeding, promptly utilize **ethamsylate**.

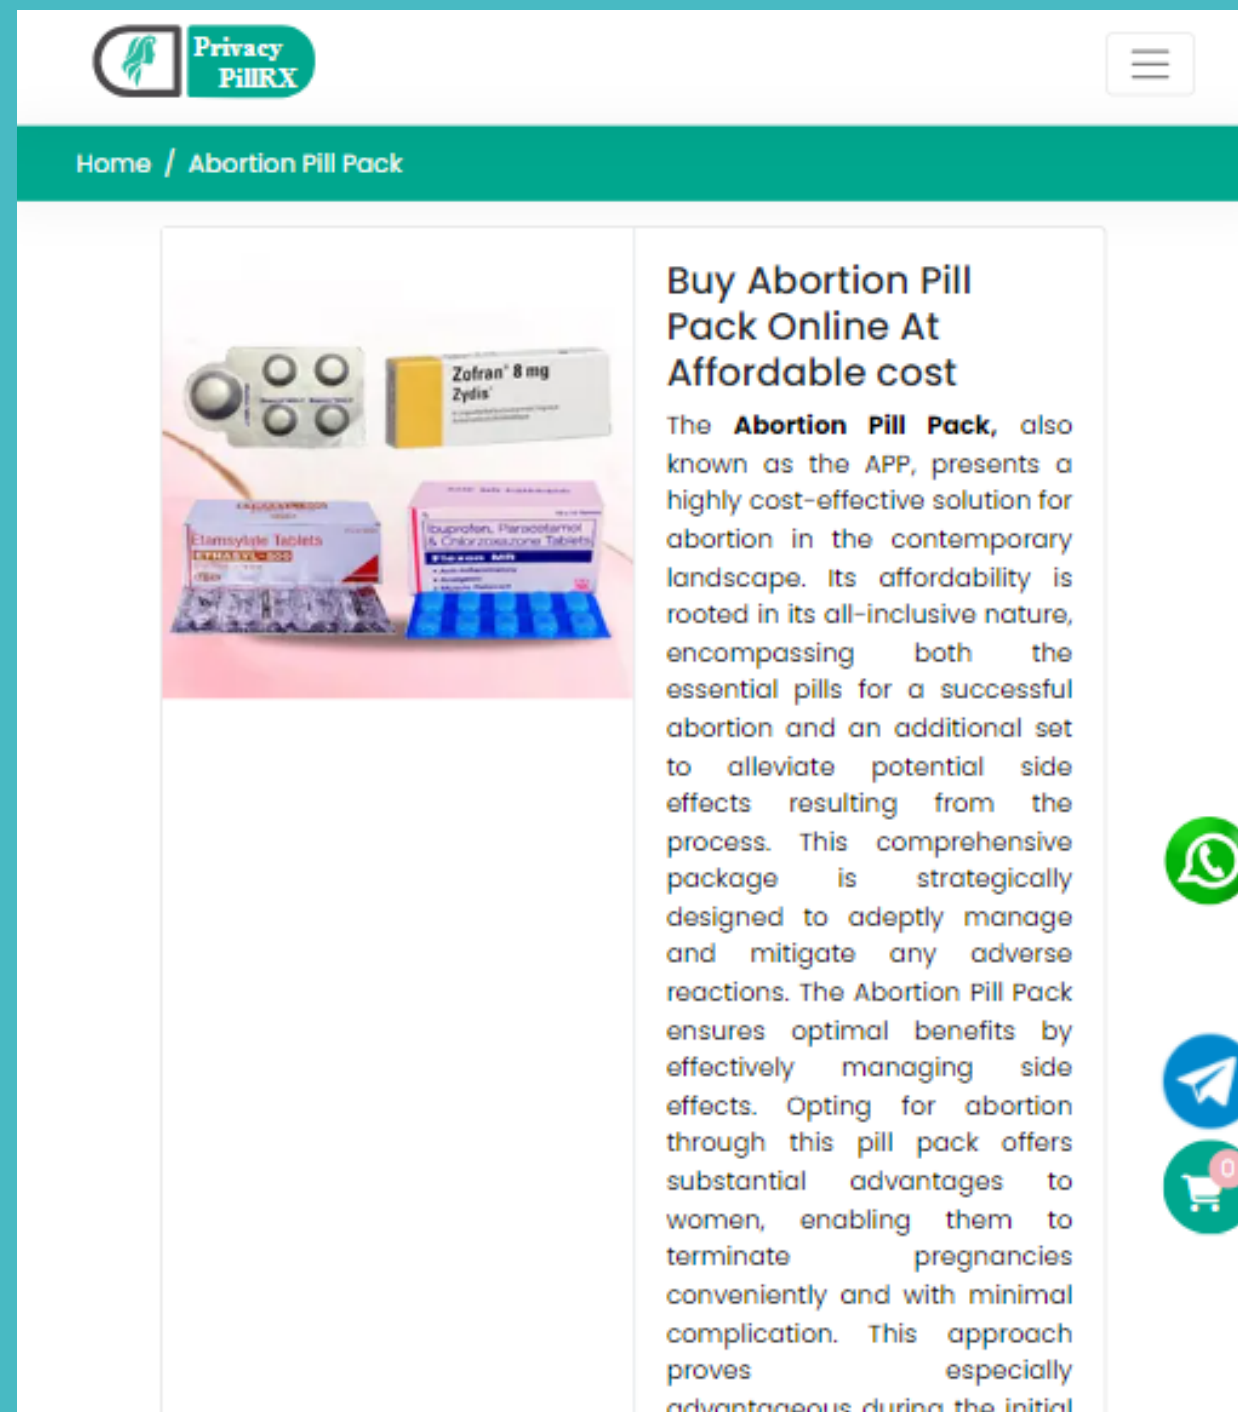

PRECAUTIONS

- If you are contemplating the utilization of the **Abortion Pill Pack** for terminating a pregnancy, it is of **utmost importance to initiate the process with an ultrasound examination**. This step is necessary to verify the pregnancy type, ensuring that it is located within the uterus, as these abortion pills are not effective in cases of **ectopic pregnancy**.
- Opting for an abortion in a home setting is advisable solely for individuals between the **ages of 18 and 35**. If your age doesn't fall within this range, it is advisable to refrain from attempting a home abortion and instead seek professional medical guidance.

WHERE YOU CAN BUY AN ABORTION PILL PACK ONLINE?
